

l'Art du menuisier: *Plates*

TABLE OF THE PLATES

VOLUME I, *First Part*

Chapter 1: Introduction and division of skills

SECTION I: Elements of geometry, lines, angles, circles, half-circles	<i>plate 1</i>
a. Different way of making perpendicular	
b. Perpendicular to a line	
c. Way of elevating perpendicular lines in the middle and at the edge of a part of a circle	
d. Way of drawing parallel lines another way	
e. Angles, making a circle, a half-circle and their usage	
f. How to use a half-circle	

SECTION II: Surfaces in general: triangles	<i>plate 2</i>
--	----------------

a. Four-sided figures	
b. Polygons – regular	
c. Ovals and the different types	
A second way to trace an oval	
A third way to trace an oval	
d. Solid figures	<i>plate 3</i>

SECTION III: Measuring lines of surfaces	
--	--

a. Evaluating surfaces	
b. How to evaluate different surfaces	
c. Measuring solids: evaluation of surfaces	
d. Measure of solid figures	

Chapter 2: Proper wood for furniture making

a. Different qualities of wood	<i>plate 4</i>
b. Sawing of wood: chopping down trees	
c. Cutting of wood: cutting trees into boards	

Chapter 3: Profiles of mouldings:

SECTION I: Mouldings in general	<i>plate 5</i>
a. How to trace geometric mouldings	<i>plate 6</i>
b. Mouldings used in furniture making	

SECTION II: Profiles of furniture and different types	<i>plate 7</i>
<i>Chapter 4:</i> Different ways of assembling wood	<i>plates 8, 9, 10</i>
SECTION I: Different methods for lengthening wood	
<i>Chapter 5:</i> Proper tools for furniture makers: different types, forms and uses	<i>plate 11</i>
SECTION I: Tools for workshops	
SECTION II: Tools belonging to furniture makers	
SECTION III: Tools for cutting wood	<i>plates 12, 13, 14</i>
SECTION IV: Tools for joining	<i>plate 15</i>
SECTION V: Tools for mouldings, finishing	<i>plates 16, 17, 18, 19, 20, 21, 22</i>
<i>Chapter 6:</i> Mobile furniture making (off site for buildings, architecture; forms, profiles, joining in general for windows with sashes and carriage sections)	<i>plate 23</i>
SECTION I: Big windows	<i>plates 24, 25, 26</i>
SECTION II: Transom windows	<i>plate 27</i>
SECTION III: Very tall windows: two stories	<i>plate 28</i>
SECTION IV: Double windows	
SECTION V: Jalousied windows	<i>plate 29</i>
SECTION VI: Jalousied windows called Persian	<i>plate 30</i>
<i>Chapter 7:</i> Shutters and “speak easy” doors	<i>plates 30, 31, 32, 33</i>
<i>Chapter 8:</i> Small windows	<i>plate 34</i>
SECTION I: Mansard windows	
<i>Chapter 9:</i> Doors in general	
SECTION I: Covered entrance doors: porticos	<i>plates 35, 36, 37, 38, 39</i>
SECTION II: Different openings for porticos and how to determine them	<i>plate 39</i>
SECTION III: Construction and decoration of frames	<i>plates 39, 40</i>
SECTION IV: Doors for carriages	<i>plate 41</i>
SECTION V: Doors for churches and palaces	<i>plate 41</i>
<i>Chapter 10:</i> Average doors having a single panel	<i>plate 42</i>
SECTION I: Pocket doors between rooms	<i>plates 43, 44, 45</i>
SECTION II: How to determine form and height of interior doors	<i>plate 46</i>
SECTION III: Making windows over doors	<i>plate 46</i>
SECTION IV: Small frames for armoires	<i>plates 46, 47</i>
SECTION V: Large frames for armoires	<i>plate 47</i>

SECTION VI: Ornaments for armoires	<i>plate</i> 48
SECTION VII: How to carve curves	<i>plate</i> 48
SECTION VIII: Different ways of cutting curves	<i>plates</i> 48, 49
SECTION IX: Doors in which the curves or decoration are different on each side	<i>plate</i> 49
SECTION X: Different way of cutting doors in decorated walls	<i>plate</i> 49
SECTION XI: Plain armoires and carving in thick wood	<i>plate</i> 50
<i>Chapter II: Small doors</i>	<i>plate</i> 50
VOLUME I, Second Part	
<i>Chapter I: About parquet and floors in general</i>	<i>plate</i> 51
SECTION I: How to position the floor joists and how to space them	<i>plate</i> 52
SECTION II: How to make parquet, the construction and the different compartments	<i>plates</i> 53, 54, 55
SECTION III: Different types of floors, their construction and how to arrange them like parquet	<i>plate</i> 55
<i>Chapter 2: Ceiling and wall decorations – general</i>	<i>plate</i> 55
SECTION I: Different types of plaster ceiling and wall decorations, their forms, usages and proportions	<i>plates</i> 56, 57, 58, 59
SECTION II: About decoration and construction of fireplaces and window frames in general	<i>plates</i> 60, 61
SECTION III: The manner of decorating and covering the wooden supports of window openings	<i>plates</i> 62, 63
SECTION IV: The decoration and construction of areas over doors	<i>plate</i> 64
<i>Chapter 3: The decoration of apartments in general and their different types</i>	<i>plate</i> 65
SECTION Ia: Vestibules	<i>plate</i> 65
SECTION Ib: Dining rooms	<i>plate</i> 66
SECTION Ic: Parlors, game rooms, music rooms	<i>plate</i> 66
SECTION Id: Bedrooms	<i>plate</i> 67
SECTION Ie: Fancy bedrooms	<i>plate</i> 68
SECTION II: Audience rooms (for receiving people asking favors)	
a. Dais rooms	
b. Salons and galleries	
SECTION III: Private apartments	<i>plate</i> 68
a. Dressing rooms and boudoirs	<i>plate</i> 69

- b. Rest rooms and baths

SECTION IV: Archives and blotters

- a. Pigeon holes for papers
- b. Libraries, their construction and decoration *plate 70*
- c. Curiosity cabinets, all types *plate 71*

Chapter 4: Churches

SECTION I: Church choirs in general: their decoration and different types *plates 72, 73*

SECTION II: Choir stalls: construction, forms, proportions, decorations *plates 74, 75, 76, 77, 78, 79*

SECTION III: About carpentry for supporting choir stalls, how to arrange the stalls and a general method for dividing the stalls into quarter-spheres and quarter-circles *plates 79, 80*

Chapter 5: Sacristies, in general *plates 81, 82*

SECTION I: The large armoires in churches, their proportion and construction *plates 81, 82, 83, 84, 85, 86*

Chapter 6: Confessionals: general proportions and constructions *plates 87, 88*

SECTION I: Chairs for preaching: pulpit *plates 89, 90*

SECTION II: Altar pieces: their decoration and proportions; also the decorations of chapels in general *plate 91*

SECTION III: Porches/Portals: their decoration and construction *plates 92, 93*

Chapter 7: Organs: woodwork around them *plate 94*

SECTION I: Decoration of organs and their proportions

SECTION II: Construction of woodwork around organs *plates 94, 95, 96, 97*

Chapter 8: Manner of installing cabinetry in general

SECTION I: Necessary iron work for cabinetry (screws, etc.) *plate 98*

SECTION II: Precautions one should take before installing any work on the wall *plate 99*

- a. How to install windows
- b. How to install big and small doors
- c. How to install decorative paneling, mirrors, etc.

Chapter 9: Art of drafting: tracing a pattern, preparing the wood

SECTION I: How to take measurements *plate 100*

- a. How to mark the work on the blueprint

- b. How to prepare woodwork for receiving sculptural ornament *plate 101*

SECTION II: About wood glues *plate 102*

a. How to construct wooden columns, bases, capitals, also pedestals and entablature (crown moulding)	<i>plates</i> 103, 104
b. How to glue wooden curves	<i>plate</i> 105
<i>Chapter 10:</i> Drawing proper curves or the science of curves relative to woodwork	<i>plate</i> 106
SECTION I: Stereotomy for helping in drafting (pattern making)	<i>plate</i> 106
SECTION II: Cutting and developing a straight cone, an oblique cone, a sphere and an ellipse	<i>plates</i> 107, 108, 109
SECTION III: Different ways of drawing parabolas and ellipses	<i>plate</i> 109
SECTION IV: Piercing of shapes	<i>plate</i> 110
<i>Chapter 11:</i> The different areas of decoration which can make use of patterns and the manners of constructing these decorations in plain wood	<i>plate</i> III
SECTION I: Different ways of constructing works from patterns in plain wood	<i>plate</i> II2
a. How to glue archivolts and arches	<i>plate</i> II2
b. How to glue wooden vaults and arches of different kinds	<i>plates</i> II3, II4
SECTION II: How to glue more wooden vaults and arches of different kinds	<i>plate</i> II5
a. The way to glue the background-arches, Saint Antoine-style, surhaussé, surbaissé and their counterparts	<i>plate</i> II6
b. The way to glue the background-arches, Montpellier-style, and to find all their cuts	<i>plate</i> II7
c. The way to glue the background-arches, Marseille-style, and their counterparts	<i>plates</i> II8, II9
Section III. The way to make jointing of keystones, and to trace the joinery of horizontal bands	
a. Some irregular background-arches, and some composed in plan as in elevation	<i>plates</i> I20, I21, I22, I23
SECTION IV: Pointed vaults in general: how to construct in plain wood	<i>plate</i> I24
a. Niche vaults and those with irregular plan	<i>plate</i> I25
b. How to glue different sorts of ceilings together in plain wood	<i>plate</i> I26
<i>Chapter 12:</i> Planning wood	
SECTION I: The projection of straight lines, or how to trace straight roof rafters	<i>plates</i> I27, I28, I29
a. Rafters ornamented with mouldings	<i>plate</i> I30
b. How to trace on joined rafters	<i>plate</i> I31
SECTION II: Rafters in the form of an arch	<i>plate</i> I31
a. Determining the shape of the arched rafters	<i>plates</i> I32, I33
b. Arched rafters and how to determine the plan in all possible cases	<i>plates</i> I34, I35
c. To cover vaulted arches, making them pointed or ribbed	<i>plate</i> I36

SECTION III: Some arched curves, flat, oblique and inclined; and how to calibrate their lengths	plate 137
a. How to determine the thickness and length of inclined curves, and to make them squared in all cases	plates 138, 139, 140, 141, 142
b. How to determine the length of inclined curves, relative to the given horizontal space	plates 143, 144
SECTION IV: Arched curves both flat and elevated, in general	plates 145, 146
a. Where the squares tend to the center of the design	plate 147
b. Where the squares are perpendicular or oblique to the base of the design	plate 148
c. Arched curves elevated and on the vertical	plate 149
d. Arched curves, whether flat, elevated and on vertical surfaces	plates 150, 151, 152, 153, 154, 155

Chapter 13: Drafted works of joinery, in general

SECTION I: How to prepare and thin the surface of drafted works	plate 156
a. Different methods of installing assembled arched works	
SECTION II: Coved joined works	plate 157
a. Description of a coving at St. Antoine, Marseille, and of its counterpart	plates 158, 159
b. How to determine the real size of circles and to find all their sections	plate 160
c. Description of a faked assembly	plate 161

Chapter 14: Stairways in general

SECTION I: Stairways of a straight shape: how to position them and their construction	plate 162
a. Stairways called "Miller's Ladder"	plate 163
b. Spiral staircase	plate 164
c. Stairways that form a square, and how to determine their landings and turns	plate 165
SECTION II: Stairways of an arched form	plate 166
a. Arched stairways both regular and irregular	plate 166
b. The inclined stairway and how to make its horizontal supports	plate 167
c. The inclined ceiling assembly	plate 168
d. Pair of arched stairways with both full-circle and S-shape, with a double incline	plates 169, 170

VOLUME II, *Third Part*

Chapter 1: Of furniture making for coaches, in general

SECTION I: Of carriages in general	plate 171
SECTION II: Different types of contemporary carriages	

SECTION III: Description of an old coach known nowadays under the name Corbillard (large vehicle for carrying the dead)	<i>plate 172</i>
a. Description of old carriages	<i>plate 173</i>
b. Description of a Berline coach, and all the parts which compose it	<i>plate 174</i>
 <i>Chapter 2: Wood used for the construction of coaches in general</i>	
SECTION I: The choices of wood for the construction of coaches	<i>plate 174</i>
a. The way to sell wood for coaches	<i>plate 175</i>
SECTION II: Carpentry tools for carriages	<i>plates 176, 177</i>
SECTION III: The planning of wood for carriages	<i>plate 178</i>
SECTION IV: Panels of carriages, in general	
a. How to trace the panels due to their different curves	<i>plates 179, 180</i>
b. How to re-shape panels by means of fire	<i>plate 180</i>
 <i>Chapter 3: The shape and provisions of modern carriages in general</i>	
SECTION I: The manner of determining the height and width of the windows, in comparison with those of a coach	
a. The grooves and small channels necessary to receive the windows: their forms, proportions and construction	<i>plates 181, 182</i>
b. The chassis for windows, their false-panels and the jalousies of all types, their forms and construction	<i>plates 183, 184</i>
SECTION II: Description of the profiles of a Berline, and the size of the wood of which it is composed	<i>plates 185, 186</i>
SECTION III: How to determine the form of carriages and to make calibrations	<i>plate 187</i>
a. Pavilions, or Imperials (top, or outside of a coach), their forms and construction	<i>plates 188, 189, 190, 191</i>
b. “Brancards” (ambulances), their forms and construction	<i>plates 192, 193</i>
c. The construction of different exterior parts of the body of a Berline	<i>plates 194, 195</i>
SECTION IV: Description of a Diligence (stagecoach, and all the parts which compose it)	<i>plates 196, 197, 198</i>
a. Double panels and their seats of all types, their forms and construction	<i>plate 199</i>
b. Carriage panels that detach, the different ways to make the openings	<i>plates 200, 201, 202</i>
c. Carriages called “Easy traveling” (dormeuses) and the different ways to make the openings	<i>plates 203, 204</i>
 <i>Chapter 4: Description of all the carriages presently in use</i>	
SECTION I: Description of a large carriage, a balloon gondola and a Berline with four doors	<i>plates 205, 206, 207</i>

a. Description of a large carriage, a Berline and of a stagecoach, mounted on their chassis, and all coaches which are similar to the latter	<i>plates 208, 209, 210</i>
c. Description of a Diable, a Diligence Coup and a Wurst	<i>plates 211, 212</i>
SECTION II: Description of a Chaise M'ontée, a Chaise de poste, of a Cabriolet and two types of litters and a sleigh	<i>plates 213, 214, 215, 216, 217</i>
SECTION III: Description of a chair with porters, Brouette and various garden chairs	<i>plates 218, 219, 220</i>
SECTION IV: Essay on the manner of suspending carriages because of their different shapes	<i>plate 221</i>

VOLUME II, Second Section of the Third Part

Chapter 5: Furniture making in general, and the different types

SECTION I:	
a. Proper tools and wood appropriate for furniture	
b. Antique furniture in general	<i>plate 222</i>
c. Different types of chair seats and their present usage	<i>plate 223</i>
SECTION II: Description of flat stools, benches, etc. and their forms, proportions and construction	<i>plates 224, 225</i>
SECTION III: Description of all kinds of chairs, their decoration, forms, proportions and construction	<i>plate 226</i>
a. How to prepare seats for upholstery	<i>plate 227</i>
SECTION IV: Caning of seats: the art in general	
a. Preparing seats for cane	<i>plate 228</i>
b. Choice of cane, manner of splitting and tools of the caner	<i>plate 229</i>
d. How to attach the cane and various operations of the caner	<i>plate 230</i>

*Chapter 6: Description of all kinds of armchairs, forms,
proportions and construction* *plates 231, 232, 233, 234, 235*

SECTION I: Description of all the large seats such as sofas, ottomans etc., and their different forms, proportions and construction	<i>plates 236, 237, 238, 239</i>
SECTION II: Description of seats for private apartments such as bathtubs, bidets, commodes, etc.	<i>plates 240, 241</i>

Chapter 7: Beds in general: their different types

SECTION I: Description of French beds, their forms, proportions and construction	<i>plates 242, 243</i>
a. Canopy beds, commonly called pavilions or imperials, and their forms and construction	<i>plates 244, 245, 246</i>

SECTION II: Description of Polish beds, their proportions, forms and decoration	<i>plates 247, 248</i>
SECTION III: Description of different types of country beds, their forms and construction	<i>plates 249, 250, 251</i>
SECTION IV: Description of daybeds, cradles and children's beds	<i>plate 252</i>
<i>Chapter 8: Dining tables, different types</i>	<i>plate 253</i>
SECTION I: Dining tables, different forms and construction	<i>plate 254</i>
SECTION II: Gaming tables: different types, forms and construction	<i>plates 255, 256, 257</i>
a. Description of billiard tables: forms, proportion and construction	<i>plate 258</i>
b. Description of small gaming tables: forms, proportions and construction	<i>plate 259</i>
SECTION III: All sorts of writing tables: forms, proportions	<i>plates 260, 261, 262, 263, 264, 265</i>
and construction	
a. Description of toilette tables, nightstands and others: their forms and proportions	<i>plates 266, 267</i>
b. Description of screens and wind shields, their forms and proportions	<i>plate 268</i>
<i>Chapter 9: Closed furniture generally under the name large furniture</i>	
SECTION I: Description of armoires: decoration, proportion and construction	<i>plates 269, 270, 271</i>
a. Description of buffets: forms, proportion, decoration and construction	<i>plates 272, 273</i>
SECTION II: Description of commodes of all sorts (washstands, chests of drawers, bureaus): their forms, proportions and construction	<i>plates 274, 275, 276</i>
VOLUME III, <i>Third Section of the Third Part</i>	
<i>Chapter 10: The different woods appropriate for veneering by the ébéniste</i>	
SECTION I: Description of "Wood from India" and its qualities, relative to cabinetry	
a. An alphabetic table of woods known as "Bois des Indes," their colors, their qualities, strong or soft, aromatic, and the name of the country where they grow	
SECTION II: French woods appropriate for cabinetry	
a. Alphabetic table of French wood, like that of Bois des Indes; their differences and their nuances	<i>plate 277</i>
SECTION III: Different dye compositions appropriate for tinting wood and the manner of using them	
SECTION IV: Thinning of wood for veneer-making	<i>plate 278</i>
a. Description of tools of veneering	<i>plates 279, 280, 281</i>
SECTION V: Appropriate carcase construction for veneering, their manner of construction	<i>plate 282</i>

Chapter 11: Simple veneering: general instructions

SECTION I: Various kinds of compositions	<i>plates 283, 284, 285, 286, 287, 288</i>
a. Manner of cutting and adjusting straight pieces and tools for same	<i>plates 289, 290</i>
b. Manner of cutting and adjusting curved pieces and tools for same	<i>plates 291, 292, 293</i>
SECTION II: Manner of gluing parquetry veneer	<i>plates 294, 295</i>
a. Finishing of veneer and different types of polish	<i>plate 296</i>

Chapter 12: Ornate veneering, called mosaic or painted wood, in general

SECTION I: Principal rules of perspective absolutely necessary for cabinetmakers	<i>plates 297, 298</i>
SECTION II: Manner of cutting, shadowing and mounting wooden ornaments	<i>plate 299</i>
a. Manner of engraving and finishing wooden ornaments	<i>plate 300</i>
SECTION III: Representing flowers, fruits, landscape and figures in wood	<i>plates 301, 302, 303, 304, 305, 306, 307</i>

Chapter 13: Assembled cabinetry, in general

SECTION I: Some tools appropriate for making assembled cabinetry, and how to use them	<i>plate 308</i>
SECTION II: Elementary ideas on the art of turning necessary for cabinetmakers	<i>plates 309, 310</i>
a. Screw-cutters and purlins necessary for this work	<i>plate 311</i>
b. Machines appropriate for making channels on cylinders and cones	<i>plates 312, 313</i>
c. A machine commonly called the "Wave Tool," and the different ways to use it	<i>plates 314, 315, 316</i>
SECTION III: The tools for locksmithing necessary for cabinetry	<i>plates 317, 318, 319, 320</i>
a. How to lock cabinetry	<i>plates 320, 321</i>
b. How to polish iron and copper for cabinetry	<i>plate 321</i>
SECTION IV: The different works of ébénistes, in general	
a. Different sorts of embroidery crafts	<i>plates 322, 323, 324, 325</i>
b. Description of a printing office	<i>plates 326, 327</i>
c. Description of "guéridons" (small tables)	<i>plates 328, 329</i>
d. Description of different sorts of desks	<i>plates 330, 331</i>
e. Description of different boxes for toiletries	<i>plate 332</i>

Chapter 14: About the third type of veneering in general

SECTION I: Description of different materials for construction of the third type of veneering	
SECTION II: The skills one uses in the third type of veneering	<i>plates 333, 334</i>
SECTION III: How to work the different materials used in parquetry, such as tortoiseshell, ivory, horn etc.	<i>plate 334</i>
SECTION IV: How to construct marquetry and how to finish it	<i>plates 334, 335, 336, 337</i>
a. General idea of different types of mosaics	<i>plate 337</i>

b. Bronze ornaments	<i>plate</i> 337
c. How to solder metal that one uses in different types of veneering	<i>plate</i> 337
d. Description and usage of varnish to varnish and gild copper and other metals	

VOLUME III, *Fourth Part*

Chapter 1: Basic ideas on the principles of architecture and the art of training, of which this knowledge is absolutely necessary to lattice-makers

SECTION I: The three Greek orders, their proportions and particular divisions	<i>plate</i> 338
a. Ionic, Corinthian and Composite capitals	<i>plate</i> 339
b. Application to buildings and the assignment to different parts of architecture like attics, basements, etc.	<i>plates</i> 340, 341
SECTION II: Elementary ideas on tracing, relative to latticework	<i>plates</i> 342, 343
a. Use of irons to support trellises	<i>plate</i> 344
b. Manner of developing the surfaces of curved trellises and for laying out the compartments	<i>plates</i> 345, 346
c. Different types of compartments, straight as well as curved, appropriate for trellises	<i>plates</i> 347, 348

Chapter 2: Woods appropriate for trellis work, and the tools for trellis work

SECTION I: Principal tools and how to use them	<i>plate</i> 349
a. Planning the wood and the tools necessary	<i>plates</i> 350, 351
b. Circles and the tools used to construct them	
c. Trellis ornaments and the tools to cut and shave them	<i>plate</i> 352
d. Description of a plane for making various thicknesses and different moulds of woods	<i>plate</i> 353
SECTION II: Different types of trellis work in general	
a. Of wire and tacks and how to attach them	<i>plate</i> 354
b. The construction of simple trellis work	<i>plates</i> 355, 356

Chapter 3: Composed trellis work *plate* 357

SECTION I: Construction of the frames of composed latticework	<i>plates</i> 358, 359
a. Construction of the frames of pilasters and columns and how to garnish them	<i>plates</i> 360, 361, 362, 363, 364
b. Assemblies of frames of latticework, preparing them to receive garnishes	
SECTION II: Ornate latticework in general; two pieces of latticework of a different decoration	<i>plates</i> 365, 366, 367, 368
SECTION III: Baskets of clay, their form and construction	<i>plates</i> 369, 370

SECTION IV: Trellis ornaments in general, different types	
a. Moulded ornaments and their construction	<i>plates</i> 371, 372, 373
b. Vases and capitals in lattice, and their construction	<i>plates</i> 374, 375
c. Flowers in lattice, and their construction	<i>plates</i> 376, 377
<i>Chapter 4:</i> Different works of carpentry needed in the garden	<i>plate</i> 378
SECTION I: Different types of garden seats	<i>plate</i> 379
SECTION II: Boxes for the garden: their different types, forms and construction	
SECTION III: Benches and frames for hothouses	<i>plates</i> 380, 381
An essay on appreciating and measuring the value of hand work	<i>plate</i> 382
Conclusion to the Art of Woodworking
